### 6.1 The Functions of the Skeletal System | Anatomy and ...

The interaction between the skeletal system and the muscular system is so constant that sometimes the two organ systems are referred to as one system--the musculoskeletal system. Skeletal muscles must be attached to something at either end to give them support while they contract. Typically this means each end of a skeletal muscle is attached to a bone. According to Hillendale Health, when a muscle contracts, it brings the two bones closer together.
