Calculating EI premiums. Each year, we give the maximum insurable earnings and rate for you to calculate the amount of EI to deduct from your employees. You have to deduct EI premiums from insurable earnings you pay to your employees. In addition, you must pay 1.4 times the amount of the employee's premiums. You may qualify for a reduction of the employer contribution if you give your employees a short-term disability plan.

Calculating EI premiums—Canadaen

SUB calculation - EI benefits plus other earnings. Under Working While on Claim, a claimant is allowed to retain up to 50% of their earnings. Once the claimant has earned 90% of the average weekly earnings amount used to calculate their benefit rate, then the earnings are deducted dollar for dollar.

Part 1 Plan requirements—Canadaen

Step 1: Enter the employee's insurable earnings \$ _____. Step 2: Enter the employee's EI premium rate for the year (See EI premium rates and maximums for current and prior year rates) _____. Step 3: Multiply the amount in step 1 by the rate in step 2 = \$ _____. The result is the EI premiums to be deducted for your employee.
