In symbolic reasoning, the rules are created through human intervention. That is, to build a symbolic reasoning system, first humans must learn the rules by which two phenomena relate, and then hard-code those relationships into a static program. This difference is the subject of a well-known hacker koan:

Symbolic Reasoning (Symbolic AI) and Machine Learning. Deep learning has its discontents, and many of them look to other branches of AI when they hope for the future.Symbolic reasoning is one of those branches. The two biggest flaws of deep learning are its lack of model interpretability (i.e. why did my model make that prediction?) and the large amount of data that deep neural networks ...
