The key aspect of a value stream map is that it creates visibility on the work that is taking place. While some people argue about the effectiveness of metrics in order to manage things, I believe there is no argument that you can't manage anything if you can't see it. Value stream maps are first and foremost

about making our work visible. Creating a value stream map

## *Value Stream Mapping - Net Objectives Portal*

The value stream map is a Lean tool that practitioners use to analyze the value stream. Value stream mapping involves drawing pictures of the process streams and then using them to look for waste. The focus is on improving the total time from beginning to end of the entire stream while maintaining this speed in the future (that is, you cannot take shortcuts now at the expense of future development). One of the great benefits of value stream mapping is that it shows the entire picture.
